

Just How Good Can a Pressure Transducer Be? **The Heise[®] DXD Pushes High Performance to the Limit**

We call it state-of-the-art.

Our customers just call it slick.

Why? Because up to 99 addressable Heise[®] DXD digital pressure transducers connect directly to a serial port on a PC using standard telephone wiring. Super accurate and remarkably stable, the DXD is used in a wide variety of critical processes, test panels and in laboratories.

Check out the DXD's outstanding features:

- Unmatched price vs. performance!
- Accurate up to 0.02% FS.
- Available in RS232 or RS485 communication protocol.
- Pressure ranges from vacuum through 10,000 psi.
- Serial port speeds up to 115K bps.
- Update rates of up to 15mS.
- 316 SS enclosure and wetted materials.
- Connects to PC with standard RJ-11 telephone or RJ-45 Ethernet cabling.
- LabVIEW[™] driver and utility software available.

Forget the A/D card; the DXD brings the digital data stream right to the PC and into software! With ultra-high accuracy and fast digital communication, the DXD delivers exceptional performance at an amazing price.
